

## Windows 10 Pro

Nedenstående vejledning kan bruges til Tobii i12/i15 hvis de kører Windows 10 PRO og til i13/i16  
Husk at tilslutte strømforsyningen før du går i gang.

1. Klik på Windowsknappen
2. Vælg Indstillinger.
3. Scroll ned og vælg **Opdatering & Sikkerhed**
4. I venstre side, vælg **Genoprettelse**
5. Under Nulstil denne PC, vælg **Kom i gang**.
6. Vælg **Fjern alt**
7. Den foreslåede indstilling **Fjerner kun filerne (ikke formattering af HD). Denne metode er hurtig, men mindre sikker.** Ønsker du at harddisken også formatteres, så klik på Skift indstillinger og derefter **Slå til og bekræft**.
8. Vælg **Næste**
9. Vælg **Reset**

Vi anbefaler kun de to ovennævnte muligheder, men se alle muligheder for gendannelse her:

Option	What it does
Keep my files > Change settings > Preinstalled apps <b>On</b>	<ul style="list-style-type: none"><li>• Reinstalls Windows 10 and keeps your personal files.</li><li>• Removes apps and drivers you installed.</li><li>• Removes changes you made to settings.</li><li>• Restores any apps your PC manufacturer installed if your PC came with Windows 10.</li></ul>
Keep my files > Change settings > Preinstalled apps <b>Off</b>	<ul style="list-style-type: none"><li>• Reinstalls Windows 10 and keeps your personal files.</li><li>• Removes apps and drivers you installed.</li><li>• Removes changes you made to settings.</li><li>• Removes any apps your PC manufacturer installed.</li></ul>

## Remove everything

- Reinstalls Windows 10 and removes your personal files.
- Removes apps and drivers you installed.
- Removes changes you made to settings.
- Removes any apps your PC manufacturer installed. (If your PC came with Windows 10, apps from your PC manufacturer will be reinstalled.)

**Note:** Remove everything > Change settings gives you two options.

Data erasure **On** removes files and cleans the drive. If you're planning to donate, recycle, or sell your PC, use this option. This might take an hour or two, but it makes it harder for other people to recover files you've removed.

Data erasure **Off** just removes files. It takes less time, but is less secure.
